

Dear Sybille,

find attached the letter of Francisco (Chico)

I personally talked with Him. He is fine and he is hard-working.

For him, the year 2009 was very difficult because the 1st Year at the university was and he had to do with the other methods and the Lerndruck at the University of Agostino Neto familiar.

But he overcomes all difficulties.

The computer, which he now assists him in many ways, as in:

1. the interpretation of the issues that exist in computer science, what is the learning areas, which he planned to study at the university the most.
2. He uses the computer for research purposes, for he received from the school's permission, his PC to the Internet network of the university to close, so he has to pay for the use of the Internet, nothing.
3. The computer also helps him to share his research and writing and therefore he is not forced to go to internet cafes to write there his research.

As you can see, this computer is it makes your life easier and reduces the costs which he would, as mentioned above.

If you have any questions, please do not hesitate to demand an explanation from me.

Thank you very much;

Luis
